

400 primer on a side wall and floor on a diesel tank in Texas.

400 wets out and penetrates the anchor profile and heavy pits.

400 excellent chemical resistance for tops of floating roofs.

### Project Data

<b>Location</b>	Texas Refineries
<b>Completed</b>	2017
<b>Project Type</b>	Tank Lining Primer
<b>Products / Systems Used</b>	Archco™ 400

### Project Details

Over the past 5 years, 50 storage tanks have been primed with the Archco 400 primer. Without exception, every contractor who has applied the 400 has stated that it is the best spraying primer that they have used.

Here are some of the things they say they like about the Archco 400.

- Easy to mix and apply
- Good pot life, even in hot weather
- Wets out the steel and flows into the anchor profile and heavy pitting.
- The 400 has a 60 day re-coat window.

### Benefits

- Excellent adhesion
- Good flexibility and impact resistance
- Good abrasion resistance
- Excellent chemical resistance
