

Water & Wastewater Corrosion Prevention Petrolatum Wax Tape System

Corrosion Prevention For:

- Sewer Pump Stations
- Water Transmission Pipelines
- Bell & Spigot Reclaim
- Potable Water Lines
- Municipal Castings
- Valves & Fittings
- Pipe Restraints
- ...And so much more

Denso Petrolatum Wax Systems conform to AWWA C217 and NACE RP0375 Standards

Water and wastewater systems run through all major cities and rural areas. There are many corrosion problems from aggressive soils to underground vaults that are constantly in wet/dry environments. Denso's petrolatum tape systems protect water and wastewater pipelines, fittings, valves, chambers and more from corrosion and water infiltration. Our petrolatum products have proven case histories dating back to the 1920's and are manufactured under ISO 9001 for manufacturing and ISO 14001 for environmental management.

Sealing & Molding

Petrolatum Tapes

Features

- Meets AWWA C217 and NACE RP0375 Standards
- Applied to marginally prepared surfaces (SSPC SP 2-3)
- Can be applied in any climate
- Can be applied to wet or underwater surfaces
- Contains no V.O.C.'s
- Can be applied by inexperienced personnel
- Conforms to irregular shapes and profiles
- Not affected by water, acid, salts or soil organics
- Long shelf life
- Will adhere to metal, PVC and polyethylene
- Excellent sealing and molding properties
- Cold applied, self supporting and flexible
- History of proven applications since 1929
