

Denso®

Denso Rock Shield

Protective Pipeline Mesh

Uses & Applications

- Provides protection of external corrosion coating on pipelines when rocky backfill is encountered
- Lightweight material that is manufactured to withstand extreme weather conditions and temperatures.

Denso Rock Shield

Denso Rockshield SD can be easily applied and provides additional protection.

Denso Rockshield HD is essential where pipelines are constructed through rocky terrain.

Denso Rockshield HD protects the pipes anti-corrosion coating.

Features

- Flexible for easy handling even at low temperatures
- Lightweight
- Porous mesh allows water flow for cathodic protection and testing
- Inert and environmentally stable
- High impact strength and tensile strength
- Cost effective protection for pipeline coatings
- Available in rolls or pads

Denso Rockshield SD in action, protecting the pipe coating.
